MATERIALS

Rubber ethylene-propylene-diene EPDM

Type of synthetic rubber used for a wide range of applications such as automotive, construction, industrial gaskets, etc.

EPDM rubber membranes are highly resistant to sudden temperature changes, aging, ozone and numerous corrosive chemicals. Resistance to many acids, alkalis, detergents, acetones, alcohols and glycols and high mechanical properties.

Likewise, formulations can be obtained with high levels of electrical insulation, medium grade fireproofing or that allow contact with drinking water. Standard EPDM rubber is 65 Shore black.

PROPERTIES

| Hardness (Shore A) | Work (°C) | Tolerances | Colours | Applications | Certifications |
|--------------------|-----------|---|------------------------|--|----------------|
| 50 a 85 | -45 a 120 | ISO 3302-1996 (E) E AND L CLASS EXTRUSION ISO 3302-1996 (E) M-CLASS CLASS MOLDEO | Black White Grey | Automotive Construction Electric Sector Industrial unions | |

Cedular rubber SBR-NBR

Cedular Rubber is produced from natural or synthetic rubber based elastomers with the addition of blowing agents. Cedular EPDM owes this sponginess to the air cells that were encapsulated at the time of manufacture, has good resistance to compression and permanent deformation.

It is hermetic and watertight (closed certificate). Areas of application of the cedular rubber: gaskets for air, hot and cold water, dust, oils and greases, diluted acids and bases, UV rays, ozone. It is also used in acoustic and vibration insulation.

The standard CDD EPDM is in black with a density of 0.70 gr / cm³

PROPERTIES

| Hardness (Shore A) | Work (°C) | Tolerances | Colours | Applications | Certifications |
|--------------------|-----------|---|----------------|--|----------------|
| 0.4 a 0.9 | -30 a 100 | ISO 3302-1996 (E) E AND L CLASS EXTRUSION ISO 3302-1996 (E) M-CLASS CLASS MOLDEO | Black Beige | They can be used in virtually every area of industry to seal, retain, insulate, and cushion. | |

Silicone rubber VMQ-PVMQ

Silicone rubber is a derivative of quartz rock combined at high temperatures with carbon. It is considered a good electrical insulator and in contact with flames burns with difficulty.

They have excellent resistance to hot air and extreme flexibility at low temperatures. Its resistance to ozone, weather, salty environments and ultraviolet radiation is extraordinary.

Production silicone available: standard insulating silicone (MVQ), conductive silicone, corona treatment silicone, steam silicone, fluoro silicone (FVMQ), very high temperature silicone (THT), very low temperature silicone (PMVQ), platinum silicone . Standard silicone is translucent 65 Shore A

PROPERTIES

| Hardness (Shore A) | Work (°C) | Tolerances | Colours | Aplications | Certifications |
|--------------------|-----------|---|----------------------------|---|--|
| 25 a 85 | -70 a 220 | ISO 3302-1996 (E) E AND L CLASS EXTRUSION ISO 3302-1996 (E) M-CLASS CLASS MOLDEO | Any color of RAL o PANTONE | They are generally tightness, for all kinds of industries, especially those of machinery manufacturers. | Farmacopea Europea 3ªedición USP XXV Clase VI Ausencia de transferencia de sabor, FDA (CFR21 sección 177.2600, etc.) |

Cedular silicone rubber

Cedular silicone or also called spongy silicone owes this characteristic to the air cells that were encapsulated at the time of manufacture, has good resistance to compression and permanent deformation. It provides excellent adaptability to uneven or worn surfaces and reduces its thermal conductivity.

This material is used in sealing gaskets, food industry, automotive, insulation gaskets, etc. Contact with fats and oils is not recommended. Standard ID silicone is in off-white or black with a density of 0.25 gr / cm3.

PROPERTIES

| Hardness (Shore A) | Work (°C) | Tolerances | Colours | Aplications | Certifications |
|--------------------|-----------|---|---|---|--|
| 10 a 35 | -50 a 200 | ISO 3302-1996 (E) E AND L CLASS EXTRUSION ISO 3302-1996 (E) M-CLASS CLASS MOLDEO | Any color exsept for translucent, RAL o PANTONE | They are generally tightness, for all kinds of industries, especially those of machinery manufacturers. | Farmacopea Europea 3ªedición USP XXV Clase VI Ausencia de transferencia de sabor, FDA (CFR21 sección 177.2600, etc.) |

MATERIALS

Rubber styrene-butadiene SBR

It presents moderate resistance to tearing, ozone and weathering, as it has unsaturated molecular chains. SBR rubber has good chemical resistance to inorganic chemicals, but not to oxidizing acids, limited to mineral acids, not suitable for organic liquids in general.

This material is suitable for sealing gaskets. Standard SBR rubber is 65 Shore A black.

PROPERTIES

| Hardness (Shore A) | Work (°C) | Tolerances | Colours | Applications | Certifications |
|--------------------|-----------|---|---------------------------------|--------------|----------------|
| 60 a 70 | -50 a 90 | ISO 3302-1996 (E) E AND L CLASS EXTRUSION ISO 3302-1996 (E) M-CLASS CLASS MOLDEO | Black White Grey Beige | Joints | |

Rubber nitrile-butadiene NBR

It is a type of synthetic rubber, its main characteristic is resistance to oils, it also has good mechanical properties such as traction, compression, flexion, and gas tightness. It presents a good adhesiveness to steel and presents a moderate aging. Not recommended for hydrocarbons, chlorines, ketones, and other oxidizing agents.

Its combination with PVC improves its poor resistance to ozone and weathering and makes it possible to be applied outdoors. Standard NBR rubber is 70 Shore A black. Standard NBR rubber is 70 Shore A black.

PROPERTIES

| Hardness (Shore A) | Work (°C) | Tolerances | Colours | Applications | Certifications |
|--------------------|-----------|---|---------|---|----------------|
| 60 a 80 | -40 a 100 | ISO 3302-1996 (E) E AND L CLASS EXTRUSION ISO 3302-1996 (E) M-CLASS CLASS MOLDEO | Black | Automotive in gasoline pipes, gaskets and seals and in general everything that has permanent contact with oils. | |

Vulcanized thermoplastic TPV

Dynamically vulcanized thermoplastics (TPV) are a special type of elastomeric thermoplastic (TPE) with which better properties are obtained due to the exclusive mixing system that dynamically vulcanizes a discrete elastomer phase immersed in a continuous thermoplastic phase

TPV Elastoprene is a completely recyclable and reusable material at the point of transformation, being environmentally friendly and improving the profitability of processes, which represents an added advantage over rubber parts and processes. TPV Elastoprene has good resistance to ozone, UV and the attack of various chemical products, while it has a service temperature of up to 125°C

PROPERTIES

| Hardness (Shore A) | Work (°C) | Tolerances | Colours | Aplications | Certifications |
|--------------------|-----------|--------------------|---------|--|----------------|
| 60 a 67 | 170 a 200 | ISO 868 ISO 815 | Black | Extruded and co-extruded sealing profiles. products with flock finishes, adhesive tapess | |

Thermoplastic TPE

TPE is a rubber-like material that can be processed with thermoplastic technologies such as injection molding, 2K molding, or extrusion. Thermoplastic elastomers (TPE) are compounds of thermoplastic materials such as PP, PBT or PA combined with soft rubber material and often incorporating additives such as oils or fillers.

They are a class of polymers or physical mixture of polymers (generally a plastic and a rubber) that give rise to materials with thermoplastic and elastomeric characteristics, they are also recyclable, since, like thermoplastics in general, they can be reused after being transformed. They have typical elastic characteristics of rubbers, but these are not recyclable due to temperature, due to their cross-linked nature that prevents them from melting when heated.
